Abstract

The present inventions relates to UHT-treated products ~~comprising~~ containing a starch n-alkenyl succinate as ~~texturising~~ texturizing agent, ~~and said~~ whereby such products have a low viscosity after UHT-treatment, but ~~full viscosity is developed~~ develope their full viscosity after a second treatment. Starch n-octenyl succinate ~~is~~ can be used as well as a combined ~~texturising~~ texturizing agent and partial egg yolk replacement in UHT-treated products. A process for preparing these products is provided.
